

Product Advisory

Date: 28 June 2019
Product: SignalOn™ Attenuator Pads & Terminators

In an effort to maintain ordering consistency across our product lines, ATX has recently changed the way the SignalOn™ Attenuator Pads (N-ACC-AP-**) and Terminators (N-ACC-TP-75) are ordered. Currently, one unit represents 25pcs. Under the new ordering system, one unit will represent one pad. It should be noted that the Minimum Order Quantity will remain as multiples of 25pcs and will be packaged in bags of 25pcs.

These changes are effective immediately.

Products Affected	New Description
N-ACC-AP-**	1 PC, 1" PAD, **DB (MULT 25)
N-ACC-TP-75	1 PC, 1", 75 OHM TERMINATOR PAD (MULT 25)

The following SignalOn products are **not** subject to this change as they are already sold as one unit, or are custom designed attenuator pad multipacks:

Products Not Affected	Description (unchanged)
JXPEQL85-**	JXP REVERSE EQ, 5-85M, **DB
JXPEQL204-**	JXP REVERSE EQ, 5-204MHZ, **DB
N-ACC-LE-**	** DB PLUG-IN EQ
JXPEQLH-**	JXP FORWARD EQ, 5-1218M, **DB
