MCX CRIMP CONNECTOR FOR RG59 HEC2 CABLE (MPMCX-HEC2)

D3.1/CCAP™ Compliant   **1.2 GHz**

## Step 1:

Requires 0.350" recommended or 0.346"crimp tool.

Step 2:

Strip cable to standard 1/4" - 1/4".

Fold all braid and outer foil back.

IMPORTANT:
Over extending center pin length **WILL DAMAGE CONNECTORS**. Under extending will make intermittent electrical contact.

Step 3:

Insert center conductor into connector receptacle and apply pressure with a twisting motion until cable is fully inserted.
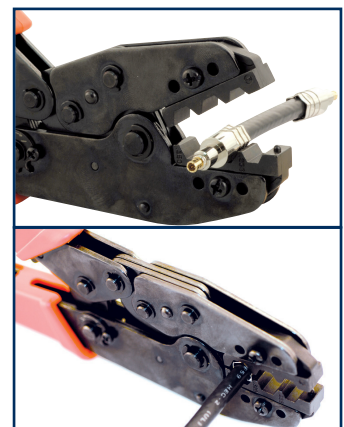

Inspect before crimping.

No braid should appear outside of the connector body (likely indicates connector not inserted fully).

Step 4:

Fully crimp tool until it releases and gently remove the connector.

Service & Support

Contact ATX Networks

Please contact ATX Technical Support for assistance with any ATX products. Please contact ATX to obtain a valid RMA number for any ATX products that require service and are in or out-of-warranty before returning a failed module to ATX.
