

## Product Advisory Notice

**Date:** May 11, 2023  
**Product:** RF Management, All  
**Reason:** Limited Availability

As the HFC community moves toward Distributed Access Architectures, the demand for headend RF Management continues to decline. To preserve production line efficiencies and limit cost increases associated with decreased volumes, ATX is taking action now to ensure customers continue to have the products they need as they make this transition.

With this product advisory notice, ATX formally announces that all remaining RF Management SKUs will enter a 'Limited Availability' state, meaning that lead times and minimum order quantities may be increased from those previously published. Effective immediately, orders placed directly through ATX for the affected products will be NCNR (non-cancellable and non-returnable). Please be advised that our stocking distributors and channel partners may carry different terms.

This advisory affects ATX's core platforms of MAXNET®, MAXNET® II, SignalOn® and Q-Series products.
